BELTS

**Heavy Duty Belts
Reinforced with
Aramid Fiber**

Our Belts are made with high-strength Aramid fiber cords for heavy duty applications and severe duty cycles. These belts have a "drier" cover fabric that was designed to increase flexibility and withstand severe clutching action, bending or twisting, heavy loads and back-side idler applications. Oil and heat resistant. Individually sleeved with dimensions in inches and millimeters. Available in 3/8", 1/2" and 5/8" widths.

Lawnmower safety starts with help from Shriners Hospitals

The snow has melted and soon enough, the long blades of grass underneath will need to be cut.

To ensure a safe lawnmowing experience, Shriners Hospitals for Children suggest that safety precautions be carefully followed.

Shriners Hospitals treat many children each year who have been seriously injured as a result of power lawnmower accidents. Many of these incidents result in the loss of fingers, toes, limbs and even eyes.

Tragically, some lawnmower accidents can result in permanent brain damage or even death. In 2001, about 275,000 people were treated in hospital emergency rooms for injuries related to lawn and garden tools, and about 35,000 of those injured were under 15 years of age.

According to the U.S. Consumer Product Safety Commission, each year about 75 people are killed and about 20,000 are injured on or near riding lawnmowers and garden tractors. One out of every five deaths involves a child. The Commission estimates that most of the deaths occur when a child is in the path of a moving mower. Although tragic, these unfortunate situations could have been avoided, if adults had taken the proper precautions.

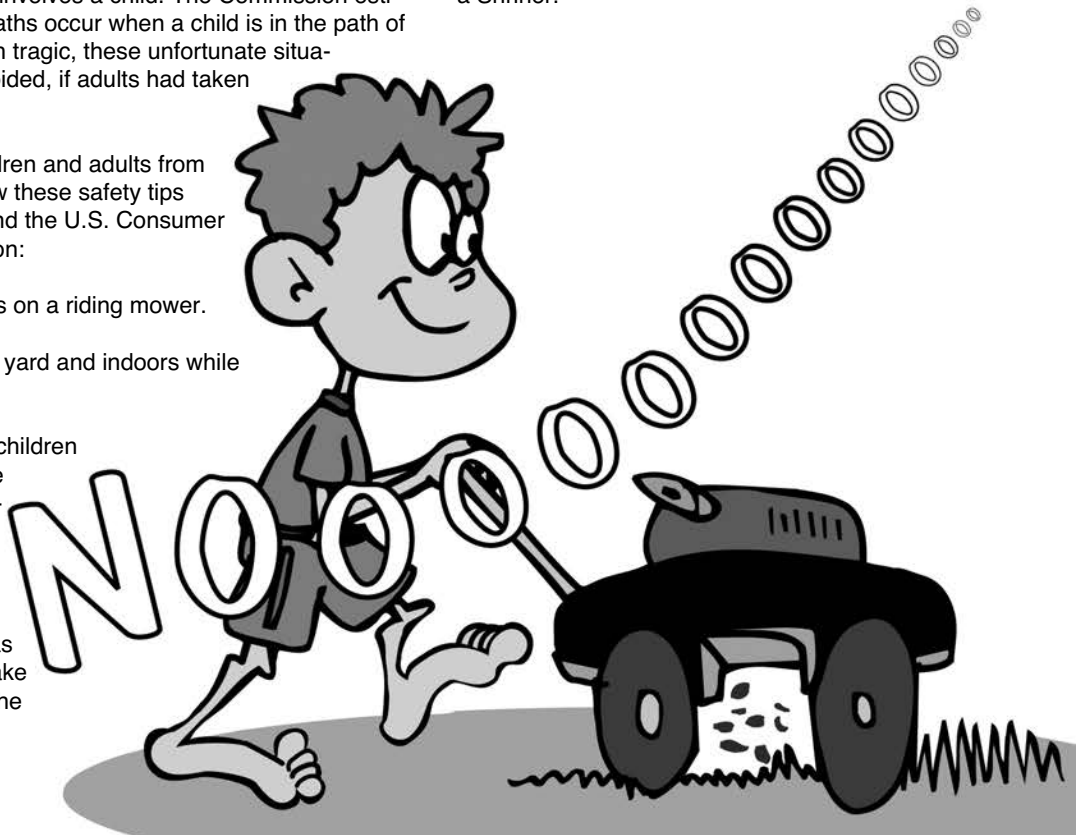

Although tragic, these unfortunate situations could have been avoided, if adults had taken the proper precautions.

To prevent injuries to children and adults from lawnmowers, please follow these safety tips from Shriners Hospitals and the U.S. Consumer Product Safety Commission:

- Do not allow passengers on a riding mower.
- Keep children out of the yard and indoors while mowing the lawn.
- It is recommended that children under the age of 14 not be allowed to operate a lawnmower.
- Always prepare your lawn for mowing. Check your lawn for items such as sticks, rocks, toys, etc. Make sure nothing is hidden in the grass.

- Handle fuel with care. Wipe up spills. Never fill the tank on a mower that is hot. Never smoke or use any kind of flame around gasoline.
- Wear appropriate clothing and shoes. Wear long pants, long-sleeved shirts, eye protection and heavy gloves. Wear sturdy, closed-toe shoes with slip-resistant rubber soles.
- Check guards and shields. Be sure to read the owner's manual and know how to operate the equipment. Don't remove or disable guards or other safety devices.
- Use a mower with a automatic blade cut-off. Stay behind the handle until the blade stops. Never reach under a mower while it is still operating. If you need to remove debris or check the blade, disconnect the wire from the spark plug.
- Don't cut grass when it's wet.
- On slopes, mow up and down rather than across the slope.

For more information on lawnmower safety, or Shriners' network of hospitals that treat children with orthopedic problems, burns and spinal cord injuries, please write to Shriners International Headquarters, Public Relations Dept., 2900 Rocky Point Drive, Tampa, FL 33607, or visit our Web site a www.shrinershq.org. If you know a child Shriners can help call 1-800-237-5055 in the United States or 1-800-361-7256 in Canada. Shriners Hospitals provide free treatment to children under the age of 18 without regard to race, religion or relationship to a Shriner.

Neway "GIZMATIC"

Order No. 32 - 8875

The "Gizmatic" is Neway's most efficient tool for refacing valves by hand. The "Gizmatic" combines the "Gizmo" & Hand Valve Refacer into one tool. Features include a crank style lever which turns the blades against the stationary valve face. This crank provides the operator with enough leverage to make the job effortless, while a second lever allows the operator to control the feed rate of the blades. The "Gizmatic" features soft jawed V-Blocks which hold the valve stem securely in a vise while the cone, either 45° or 30°, automatically centers itself on the valve face. This unique tool offers a unique value in valve refacing.

Replacement Paddle Fasteners and Scraper Bolts

Order No.	Description	
41 - 5517	Bolt (Scraper) SBB-TJ-100 100/box	MIN010
41 - 5518	Nut (Scraper) SBN-TJ-100 100/box	MIN010
41 - 5519	Fastener (Paddle) PF-TJ-100 100/box	MIN010

Fasteners (Toro & Jacobsen only)

Toro—Paddles have 7 fasteners on each (14 fasteners per machine). Scraper has 3 bolts and 3 nuts each.

Jacobsen—Paddles have 6 fasteners each (12 fasteners per machine). Scraper has 3 bolts and 3 nuts each.

Note: Paddle fasteners—Should be replaced when paddles are replaced. Our fasteners are the next size larger and help prevent backing out because of repeated removal and assembly.

Scraper bolts—Are a button head allowing the user to insert an allen wrench and thus remove more easily. Generally, the nut and bolt rust together and have to be cut apart.

Both the paddle fastener and the scraper bolt will have a pre-applied adhesive to help prevent loosening due to vibration.
