Condition: It has been determined that the batteries installed in the affected models may not contain upper and lower fluid lines. Since it is imperative that the correct level of battery fluid is maintained, upper and lower fluid lines must be added to the affected batteries.

Solution: Inspect the battery on the affected models to determine if the battery contains upper and lower fluid lines. If the battery does not contain the appropriate lines, install Battery Decal (p/n 0411-600).

■ **NOTE:** Affix the appropriate decal to the battery with the top of the decal positioned immediately below the bottom edge of the battery cover. Make sure the battery area where the decal is affixed is thoroughly cleaned and dried prior to affixing the decal.

Please contact owners of an affected ATV concerning this issue and make arrangements to have the necessary service work completed.

Parts:

Order an appropriate number of Battery Decal (p/n 0411-600) through normal parts-ordering channels. Your dealership Parts Account will be charged and then credited upon receipt of a Warranty Claim Request form.

■ **NOTE: Battery Decal (p/n 0411-600) will be available on approximately October 1. Any orders placed prior to this date will be shipped as soon as the decals are available.**

Warranty:

A labor allowance of 0.2 hr will be paid per affected ATV.

Only one vehicle identification number (VIN) per claim can be entered.
