

## SB, Upgrading chassis from 1998/99 to 2002 specification, 2002-01

Kit 535 10 49-01 contains all the necessary parts to convert the aluminium tube, front beam and front wheels on a 1998 or 1999 model Auto Mower or Solar Mower to 2002 specification. If any of these parts is damaged on an older mower we recommend upgrading to 2002 specification. The new components offer greater resistance to mechanical wear and longer life.

- The aluminium tube has been strengthened from 1 mm to 1.5 mm
- The front beam is made of a more rigid material and is more securely attached to the aluminium tube
- Front wheels now have 5-mm axles instead of 4-mm
