SB, 357, Cylinder, 2003-02

A fully automatic decompression valve will be introduced on the model 357. To prepare for its introduction a cylinder with a nipple will be fitted during production.

Spare parts:

The cylinder assembly will be supplied ready for fitting with an automatic decompression valve. The cylinder can be used without a decompression valve if a plug and protective cap are fitted.

New part no.	Description	Excl. part no.	Remark
