Products: T-35 Trimmer Head Kit (531 30 01-94)

Subject: Incorrect Part Included in Service Kit

When ordering the new T-35 trimmer head part # 531 30 01-94, the trimmer head comes packaged as a kit that should also include a protective washer and an instruction sheet explaining proper installation.

We have received reports of some kits coming with a drive cup (B) instead of the protective washer (A). If you receive a kit containing a drive cup instead of a washer, the drive cup should be discarded and replaced in the kit with the protective washer part no. 537 24 09-01.

It is recommended that you check your inventory to identify and correct any of these kits that you may have purchased. Contact our technical service representatives to request replacement protective washers.

Part No.	Description
537 24 09-01	Protective Washer
