Subject: Consumer Z Mower Deck Tension Relief Lever.

Service Information:

The tension relief lever spring on the CZ mower deck is close enough to the deck shell to vibrate and wear into the deck surface. The new lever changes the geometry of the spring hook-up, eliminating deck contact.

A new linkage swivel is also available that is retained in the tension relief lever with a cotter pin, rather than the retaining ring. The 5/16" flat washer that came off the old swivel is reused with the cotter pin.

Husqvarna recommends the replacement of these items for any retailed mower where the spring is contacting the deck.

Parts Information:

P/N 539 108668 Qty. 1 Tension Relief Lever

P/N 539 108883 Qty. 1 Swivel, Relief Linkage

P/N 539 990365 Qty. 1 Cotter Pin, 1/8 x 1 Plated

Warranty Information:

Normal warranty applies.
