Type -03 (djungle version)  
De type -03 (version jungle)

CLUTCH AND CLUTCH DRUM/SPROCKET

On type -03 saws (djungle version) we have introduced a larger clutch with linings into production.

Clutch 501 67 52-01 is replaced by 501 89 60-01.

Clutch drum/sprocket 501 29 30-01 is replaced by 503 08 48-01.

Clutch spring 501 20 87-01 remains.

CLUTCH COVER 501 54 45-01

Clutch cover 501 54 45-01 has been modified for the larger type clutch.

The part number remains.

When equipping earlier saws with the larger clutch, clutch cover 501 54 45-01 must be replaced or modified at the bar attachment for enough space.

Larger clutch and clutch drum/sprocket was introduced from serial No. 5051349.

NOTE! This modification only occurs on type -03 saws (djungle version).

Larger diameter clutch can not be used on saws equipped with a chainbrake.
