

MODEL **238, 44**

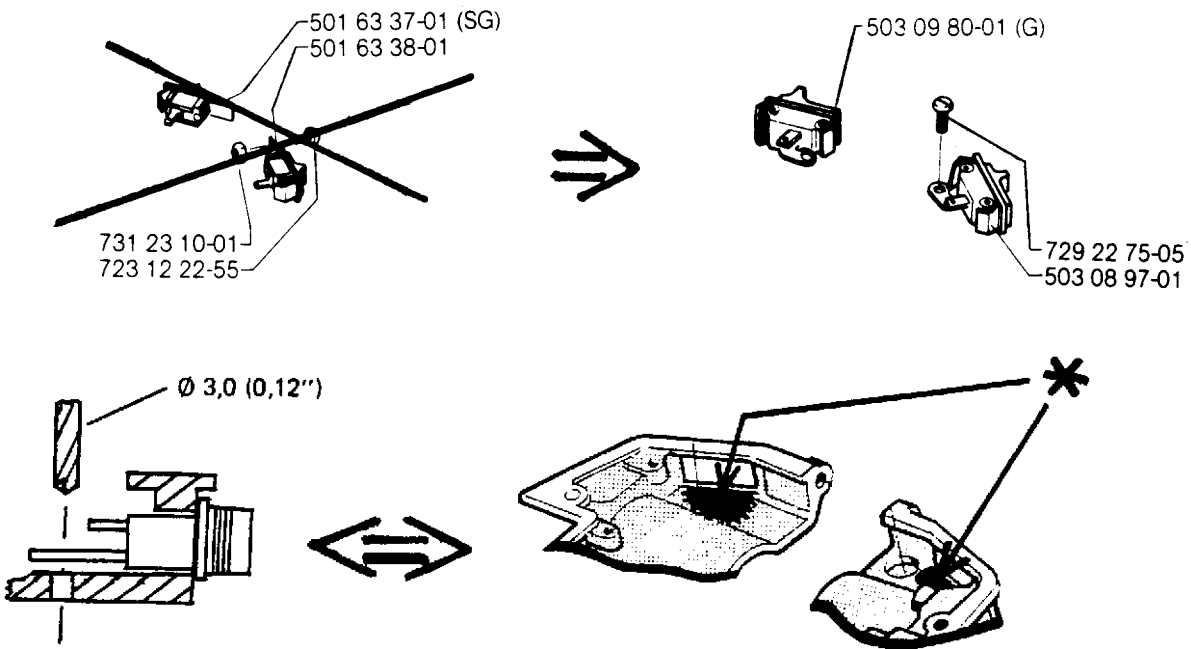

STOP- AND HEAT SWITCH

New types of switches have been introduced in our production, according to below.

Rebuilding kits for earlier manufactured saws are available. See next service bulletin.

Crankcases for the model 238 have since 1986 been adjusted to assembly of these switches with a material reinforcement (approx. 1 mm) for screw, according to the marking * below.

238

44
