

## MODEL 181

### REPAIR KIT – STOP SWITCH 503 48 71-04

In order to make it possible to mount the new type of stop switch on the model 181, a new so called repair kit is available.

#### Mounting instruction:

Place the new stop switch in the crankcase and drill a hole  $\varnothing 3.0$  mm (.1200") in the crankcase, with the switch as a template. Then attach the stop switch with the enclosed screw.

If necessary, exchange the connector for the ground lead to the enclosed connector, depending on which design the exchanged stop switch has.

<u>Ref. No.</u>	<u>Description</u>
