

MODEL **39 R**

WINTER KIT

A winter kit is introduced, for use during extreme winter conditions.

<u>New Ref. No.</u>	<u>Description</u>
502 12 59-01	Winter kit compl. (incl. 4 plastic plugs)

The winter kit is mounted as follows:

- Remove the cylinder cover and cut off the lid in the insulation wall.  
Press on the plastic plugs according to the illustration.

When returning to summer use:

- Remove the plastic plugs in the crankcase and the cylinder cover and mount the plastic plug, which have not been used earlier in the insulation wall.
