

## THE IRONHORSE

### New steering clutches

The clutch halves (2 dogs) Ref. No. 531 00 01-82 and 531 00 01-02 are now available with 4 dogs, Ref. No. 531 00 01-81 and 531 00 01-03. (Ref. No. 531 00 01-02 is available in version 531 00 01-61 on machines manufactured earlier during 1987).

The new clutches will make the machine easier to operate and at the same time more comfortable to drive.

Note! Both the rigid and the rotating clutch must be changed on the two drive shafts.

Note! If the clutch 531 00 01-61 (2 dogs) is attached to the machine, the sealing ring 531 00 01-04 must be ordered also.

The reason for this is that a sealing with  $\varnothing$  37 mm is used on this machine. We now use sealing with  $\varnothing$  35 mm.

Clutch with included sealing is also available on the Ref. No. 531 00 14-62.
