

MODEL 250 RX

BUSHING FOR FLEXIBLE SHAFT

In order to reduce the wear between bushing and shaft, the material in the bushing has been changed from bronze to polyamid.

In order to receive grounding of the shaft, a spring of sheet metal is introduced between the crankcase and the shaft.

New Ref. no.	Description	Excluded Ref. no.	Remark
502 05 54-03	Bushing	502 17 83-02	1)
502 25 67-01	Spring sheet		
725 52 87-55	Screw		

1) Remains as a spare part

The change is introduced from serial number 0360130.
