

Model 394

Throttle cable

The following improvements are made in order to even more increase the durability:

- New material on the outer cover (the previous was black, today light brown)
- Inside cables covered with plastic
- Cast nipples (the earlier were pressed on)

New Ref. No.	Description	Excl. Ref. No.
503 52 04-02	Throttle cable	503 52 04-01

Introduced from serial number: 3230292

NOTE!

Saws manufactured earlier than 1993: The bottom of the carburettor area, ref. no. 503 55 58-01 should be modified according to the illustration. At the underside of the bottom, the marked area should be filed (rounded off). This measure prevents that the cable cover wears out.
