

Models 254,262

Cylinder with decompression valve

In order to make the saw easier to start a decompression valve is mounted on some versions.

The decompression valve lets some of the compression out from the cylinder and with that makes it easier to crank the engine.

New Ref. No.	Description	Excl. Ref. No.	Remark
503 50 39-03	Cylinder with a recess for the decompression valve	503 58 67-72	254
503 54 11-72	Cylinder with a recess for the decompression valve		262
503 71 53-01	Decompression valve		254,262

For Husqvarna Parts Call 606-678-9623 or 606-561-4983

Cylinders with decompression valves are mounted on the following versions:

254XP	965501800
	965502600
254XPG	965511800

Other versions are mounted without a decompression valve.

262XP	965520300
262XPG	965521100
