Model 394

New air filter type K & N

During extremely dusty conditions, it can be necessary to mount another air filter type. We have therefore introduced a special filter kit. The kit is only available as a spare kit.

The kit can be mounted on all versions of the model 394 without difficulties.

The filter is cleaned as usual. Oil the filter thoroughly in order to receive optimum filter function. Use the Husqvarna air filter oil ref. no. 503 47 73-01. We recommend to spray the oil on the filter.

New Ref. No.	Description
503 74 68-01	Filter kit compl.
503 73 38-01	Filter cover
503 70 89-01	Air filter
503 56 00-02	Clamp
