Model 394

Starter device

A dirt repelling disc is introduced in the starter device. The disc is mounted between the pulley and the return spring. At the same time the post for the return spring is shortened by 11 mm. The changed starter housing is marked with the casting code "S".

NOTE! If the disc is mounted in starter housings of older design, the post for the return spring must be shortened by 11 mm.

New Ref. No.	Description	Excl. Ref. No.
503 74 36-01	Disc	

The other ref. numbers are unchanged.

Introduced from serial number: 4010001
