Clutch drum

A new material has been introduced for all clutch drums. The new material gives a longer service life and improves the saw's braking times.

Due to reasons of co-ordination the connection against the oil pump worm wheel has been changed at the same time as the new material is introduced on all 3/8 versions from Ø 20.5 mm to Ø 19.0 mm, i.e. the same size as on the 0.325 drum. To be able to replace the old clutch drum the oil pump worm wheel* 503 55 78-01 is supplied with the complete 3/8 drum.

New Ref. No.	Description	Excl. Ref. No.	Remark
503 64 66-03	*Clutch drum 3/8 x 7 compl.	503 64 66-02	
503 64 66-04	Clutch drum 0.325 x 7 compl.	503 64 66-01	
		503 64 29-01	R

R = remains as a spare part for earlier models.
