Oil plug washer

To prevent the washer from disappearing when filling with grease a new crowned washer that sits on the plug has been introduced into production from week 01-96.

When changing to the new washer it must be fitted with the concave side facing the bolt head.

New Ref. No.	Description	Excl. Ref. No.	Remark
502 28 62-01	Oil plug washer	502 01 14-03
