

## SB, 371, 362, Carburettor, 1998-08

In order to lock the choke valve in the closed position a lever and spring-loaded ball have been fitted to the carburettor housing. This requires a number of new parts. The carburettor has also been redesignated HD6A. Parts with the EPA designation are only used on the HD12A carburettor.

Earlier versions of carburettors can be converted with the aid of kit 537 02 98-01\*.
