

MODEL: Peerless Hydrostatic Transmission

SUBJECT: Features & Benefits

Below are listed some features and benefits that can be used to self educate and be informative to the dealer.

<i>Feature</i>	<i>Benefit</i>
<ul style="list-style-type: none">• No maintenance of internal fluid levels.	<i>Factory Sealed; no servicing or monitoring of fluids. Reduces the chance for contamination or wrong oil being used.</i>
<ul style="list-style-type: none">• Separate chambers for hydraulic and gear oil.	<i>This protects the dirt sensitive hydraulic components.</i>
<ul style="list-style-type: none">• Internal reservoir for oil expansion.	<i>Prevents entry of moisture into oil chamber.</i>
<ul style="list-style-type: none">• Easy-to-find wide neutral.	<i>Neutral is located within a range, not at a single point. Shifter adjustment easier to do should it be needed.</i>
<ul style="list-style-type: none">• No vehicle creep.	<i>Vehicle will not creep forward when placed in neutral.</i>
<ul style="list-style-type: none">• Hydrostatic bearings.	<i>Superior load carrying ability with a concept proven in industrial hydraulics.</i>
<ul style="list-style-type: none">• Easy-to-change brake pads.	<i>Brake pads can be serviced without disassembling transaxle.</i>
<ul style="list-style-type: none">• Mechanical disconnect.	<i>Superior to a by-pass valve for transporting.</i>
