

Hiller / Furrower

OEM-290-250 / 290-250-081

The most popular attachment because it does so many jobs. Mounts to the rear of the depth regulator bracket. Furrower blade easily makes plant rows, trenches, ditches to 8" deep. When hiller wings are attached to furrower blade, attachment makes hilled rows and raised bed gardens. Converts from a furrower to a hiller and back again, in seconds, without tools.
