English 1 (1)

SB, 240, 245, 250, 252, Fuel tank, 2001-03

The material used for the fuel tank is now transparent so that it is easier to judge the fuel level. The fuel cap hole has also been raised from the tank by approximately 8 mm to make it easier to keep clean around the hole when filling.

The part number is the same as before, 502 11 51-04.
