SB, 225 H, 225 HBV, Crankcase, 2001-03

A new crankcase with plugged holes for the fuel pump (air-purge) is now available. This crankcase should be used on older machines without a fuel pump, manufactured up to 1997.

Also included with the crankcase is a fuel cap with venting valve, as the tank venting is moved from a separate venting valve to the fuel cap.

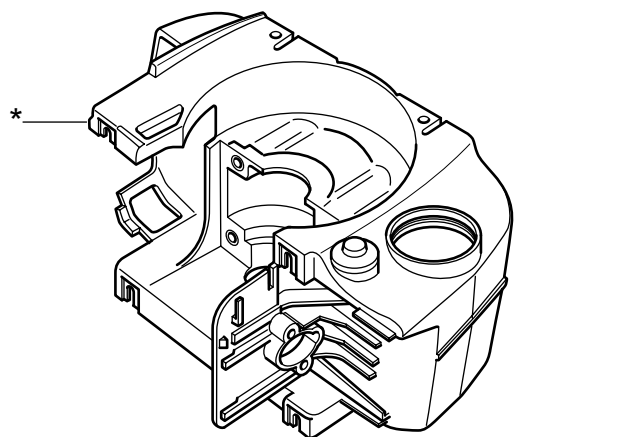

On machines with a fuel pump, manufactured from 1998, the earlier crankcase 503 77 11-04 should be used.
