SB, 346, 351, Clutch, 2002-02

The clutch has been reinforced and modified. The modification improves the durability of the springs by increasing the contact area between the springs and clutch.

The earlier version of clutch will be fitted to models 340, 345, 350 until further notice.
The modified clutch will be supplied as a spare part for all models.

Introduced from serial number:	346	020800001
