## SB, 350, 346, 351, Oil pump, 2002-03

If the oil flow is too low and a higher flow is desired, the pump piston from model 357 or 359 can be fitted. This is estimated to increase the oil flow by around 40%. The pump piston for models 357/359 has a black oxidised finish.

Note that when pump piston 537 06 93-01 is fitted to models 350, 346 or 351 the oil tank will be emptied before the fuel tank.

New part no.	Description	Excl. part no.	Remark
537 06 93-01	Pump piston		357, 359
537 06 91-01	Pump piston		350, 346, 351
