

SB, 250R, 252RX, Starter, 2002-05

To improve the life of the pulley and starter housing we are fitting a larger pulley post to the starter housing. The pulley, starter housing and starter assembly therefore have new part numbers. The pulley post now has a diameter of 11 mm compared to the previous 8 mm.

Old pulleys will not therefore fit the new starter housing. Similarly, new pulleys will not fit the old starter housing.

Old pulleys will be available as spare parts.

Old starter housings should be replaced with the new starter assembly.

A larger washer with a diameter of 15 mm also replaces the earlier 12 mm washer fitted under the pulley screw.

The composition of the pulley has also been modified to extend its life.

New part no.	Description	Excl. part no.	Remark
502 17 22-09	Starter assy.	502 17 22-03	
537 13 15-01	Pulley	502 28 07-01	A
502 17 20-04	Starter housing	502 17 20-03	
503 23 00-35	Washer	503 23 00-11	

A = still available as spare part
