SB, 346 XP, 353, 357 XP, 359, Metric screws, 2003-03

Screws with metric threads have been introduced to increase the strength of screwed joints in the crankcase. These replace the previous PL screws. Parts are not interchangeable, since the threads can be damaged if the wrong screws are used. To prevent the mixing of parts, metric screws are supplied with replacement crankcases (346XP, 353, 537 17 19-03) (357XP, 359, 503 92 53-71). The screws affected are shown below:

Introduced from serial number:	346XP	030500001
	353	030500501
	357XP	030500001
	359	030500048

*compl 537 17 19-03 (346XP, 353)
 **compl 503 92 53-71 (357XP, 359)
