

MODEL **44**

IGNITION SYSTEM, IIDA-CIRCUIT

The following improvements have been made:

- A. The air conductor has been equipped with a plastic stop, which defines the lida-circuit in a firm position.
- B. The lida-circuit will be assembled with a lock washer. This gives a better grounding of the lida-circuit.

These measures give the saw an increased reliability.

A from serial number 6040670

B from serial number 5351301
