MODEL 281

NEW MANIFOLD + WARM START KIT

In order to improve the warm start characteristics, a material change is made in the manifold and gaskets. At the same time a so called warm start kit is available, where the new components are included.

The difference between an old and a new manifold is easy to recognize. The new manifold is coloured light brown and the old one was dark brown.

<u>New Ref. No.</u>	<u>Description</u>	<u>Excluded Ref. No.</u>
501 80 66-02	Manifold	501 80 66-01
501 29 64-02	Gasket	501 29 64-01
501 80 68-02	Gasket	501 80 68-01
501 80 66-02	Manifold	Warm start kit 503 50 24-01
501 29 64-02	Gasket	
501 80 68-02	Gasket	
503 20 21-06	Screw	

NOTE! When the warm start kit is mounted on an old saw, the rubber bellows 501 51 73-01 between carburettor and crankcase should be excluded and the hole in the crankcase should be covered with tape or similar.
