

THE IRON HORSE

JH 125 Pro power winsch, JH 125 Standard, and JH 125 Pro will be equipped with a new gear shifting lever, with deliveries from the middle of September -89.

New parts:

531 00 14-66
531 00 14-65
531 00 14-72
531 00 14-73
531 00 14-74

Excluded parts:

725 53 79-01
531 00 02-31
738 61 17-05
531 00 00-79
531 00 02-28
732 25 16-01
531 00 02-44
734 11 45-71
531 00 02-33
732 25 14-01
531 00 02-32
531 00 02-39

The gear shift lever and the included parts can be ordered on the Ref. No. 531 00 14-63.

When changing the gear shift lever on old machines with levers of older model, the stop screw will be replaced by a roll pin.

Drill a hole for the clamp screw through adapter and shaft.

The reason for the change is that the gear shift shaft on the gear box does not reach the stop screw. (The shaft is longer on machines, which have the new gear shift as standard). Therefore make sure that the hole for the lock pin will be drilled approx. 5 mm lower than the screw hole.

Please turn over!
