

MODELS 36/41, 51/55, 42/242, 254, 262, 281/288, 394, 3120

TANK CAP

Husqvarna has 3 different types of tank caps for the models mentioned above. One oil tank cap for small saws and two fuel tank caps (these are also used as oil tank caps on the models 281, 288, 394 and 3120). The difference between the two fuel tank caps are the size of the O-ring/sealing ring. See the table!

Tank cap compl.:	501 81 96-02	503 14 38-01
O-ring:	503 26 30-11	740 44 07-00
Tank cap holder:	503 57 89-01	503 57 89-01

Ref. no. 503 26 30-11 is a standard version and ref. no. 740 44 07-00 is an oversize version to be used if leakage occurs.

All models are delivered with a standard O-ring (tank cap compl. 501 81 96-02). The only exception is the fuel tank cap on the models 3120. It has the ref. no. 503 14 38-01 with an oversize O-ring ref. no. 740 44 07-00. See the illustration.
