MODELS **268,272**

NEW AIR FILTER

On some versions of the model 272, a so called oiled foam filter is introduced, type 281/288. The airfilter is made for extremely dusty conditions and must always be oiled.

The air filter also fits the models 268.

Ref. no.: See below.

NOTE!

When mounting, the inner filter holder (A) must be placed completely inside the filter-body (B), in order to receive a perfect sealing against the holder (C).
