

## MODELS **281/288**

### NEW AV-ELEMENT

In order to receive a more rigid AV-system, a new AV-element is introduced on some versions. The elements consist of steel springs, which are mounted in the 4 rear recesses on the fuel tank. At the same time the screw is changed for the attachment to the crankcase and it is made 4 mm longer.

New Ref. No.	Description	Excluded Ref. No.
503 51 48-01	AV-element	{ 501 81 47-01*
		{ 501 81 47-02*
725 53 29-55	Screw	725 53 27-56*

\* Remains on the other versions

The change applies to the versions 12, 14 on the models 281 and 02,04,06 on the model 288.
