New fuel hose

We can not get any supply of the original fuel hose any more. If you need a fuel hose, please use rebuilding kit as below.

The new spiral shaped fuel hose is introduced in order to simplify the change of fuel filter.

| New ref no | Description | Excluded ref no |
|---------------------|------------------------------|------------------------------------|
| 503 69 72-01 | Fuel hose rebuilding kit | 501 42 65-01 |
| The kit consists of | 503 57 76-01 501 27 13-02 | Spiral fuel hose Rubber bushing |

NOTE! When mounting a new hose, the full length of the extended hose over the tank should be 60-70 mm.

On saws with the old type of fuel hose, the new spiral shaped hose can be mounted according to the following:

- 1 Drill the existing hole in the tank to a diameter of \varnothing 9,5 mm.
- 2 Clean the tank from drill filings.
- 3 Mount the rubber bushing ref no 501 27 13-02 in the hole.
- 4 Mount the spiral shaped hose so the full length of the extended hose over the tank will be 60-70 mm.
- 5 Mount the fuel filter on the hose.
