

# Model 394

## Silencer

In order to improve the durability on the front part of the silencer, the sleeves on the silencer are extended. The silencer nuts are tightened directly against the sleeves.

The screws are lengthened with 2,5 mm also, due to the lengthened silencer. The longer screws are enclosed to all the silencer versions and can also be used to the previous design of silencers.

New Ref. No.	Description	Excl. Ref. No.	Remark
503 71 13-01	Silencer Europa	503 46 61-01
