

## Model 250 RX

### Cover plate

A cover plate is introduced in order to improve the cooling of the engine. The plate is mounted between the cylinder and the silencer. See illustration.

The sealing plate, ref. no. 503 44 77-01, between the cylinder and the silencer is therefore excluded.

New Ref. No.	Description
502 27 23-01	Sealing plate

Introduced in production at the end of January 1993.
