Model 250 R/RX

Bevel gear

The bevel gear has been modified as follows:

- The locking mechanism on the input gear and ball bearing has been changed to the same as that on model 240/245.
- Cover, protective washer and driving disc are also identical to model 240/245.
- New assembly of the blade axle and ball bearings.
- The seal on the drive shaft has been removed from the bevel gear and is now mounted in the shaft.

N.B. When changing the bevel gear, the seal, seal holder and O-ring must be mounted in the shaft. These parts are supplied with complete mitre gears.

New ref no.	Name	Old ref. no.	Remarks
502 27 11-02	Bevel gear, complete	502 03 91-03	
502 27 28-01	Washer		
502 27 26-01	Cover	502 04 58-06	R
503 20 02-16	Screw	725 53 28-55	R
