## Model 254XP, 257, 262XP

### Pump piston with more oil flow

On the request of markets that use the long bar we have produced a pump piston that gives more chain oil. The pump piston is marked with 2 machined slots and is only available as a spare part.

New Ref. No.	Description	Excl. Ref. No.	Remark
501 87 21-02	Pump piston	-	Extra oil flow

#### NOTE!

If the saw is used with maximum oil flow and a low engine load the chain oil will run-out before the fuel resulting in damage to the cutting equipment.
