

## Model 225

### Silencer outlet and screen

The front half of the silencer does now have the long groove for opening up a bigger screen area in use.

The screen is also modified for easier service. It is shorter and stops on topside of silencer screws.

You don't have to take the screw out, just loosen one or two turns, to take the screen out.

New Ref. No.	Description	Excl. Ref. No.	Remark
503 71 73-03	Silencer compl FF	503 78 03-01	
503 79 83-01	Front half silencer	503 71 65-01
