## SB, 245, 250, 252 RX, Throttle cable, 1997-12

A heavier throttle cable has now been introduced into production on 252RX. The throttle cable is also available as a spare part for both types of cable routing on the 250RX. One for the present design where the cable is routed through the crankcase and for the previous design where the cable was routed in front of the clutch cover and in, in front (horizontally) of the carburettor.

The inner cable now has a diameter of 0.9 mm compared to the earlier 0.5 mm.

In addition it consists of more wires, which are also of a stainless steel material.

By the carburettor the casing also has a rubber sleeve that prevents water and dirt from entering between the casing and wire.

Introduced into production from serial number: 252RX 7430001

New ref. no.	Description	Excl. ref. no.	Remarks
502 28 60-05	Throttle cable	502 28 60-04	Current cable routing
502 28 60-06	Throttle cable	502 28 60-03	Previous cable routing
502 28 60-08	Throttle cable	502 28 60-01	245RX
