An air-purge unit, which pumps fuel from the fuel tank to the carburettor, has been fitted to the above models to make starting easier. This has involved the development of a number of new components. In order to improve the fixing of the carburettor we have introduced a special bolt and nut. These cannot however be fitted to machines with serial numbers earlier than those listed below.

The modifications take effect from the following serial numbers:

225R,L,LD	19991300398
232R,RD,L	19991100530
235R	19991200001
240RBD	19991400006
240L	19991400001
