English 1 (1)

SB, 250 RX, 252 RX, Winter kit, 1999-11

A winter kit is now available for the 250 RX and 252 RX.

The kit consists of a blue cylinder cover and a cover for the starter, also blue. Two additional screws are included for the starter cover.

The cylinder cover has an air duct that leads warm air into the carburettor space through the grille in the top of the cylinder cover. The insulation wall inside the cylinder cover has a hole in it, as does the orange standard cover. This hole must **not** be plugged.

Fit the starter cover as shown in the diagram.

The cover is designed partly to raise the engine temperature, and hence the temperature of the cooling air, and partly to prevent snow and rain being drawn into the carburettor space by the fan.

Replace the two upper screws from the starter with those supplied in the kit.

New ref. no.	Description	Excl. ref. no.	Remarks
537 07 47-01	Winter kit		
537 07 46-01	Starter cover		
503 20 02-25	Screw
