- Ref** - Reference numbers correspond to the reference numbers on the illustrations. All illustrations are representative only, and do not necessarily look exactly like the actual part. "NI" signifies the part is not illustrated. Reference numbers may be skipped when they apply to other models.
- Description*** - Describes the part for the related part number.
Abbreviations:

ASSY. - Assembly	A.C. - Alternating Current
L(100L) - Link(100Links)	D.C. - Direct Current

W - Watt	Interruptor
- Mod*** - Model alpha labeling is unique per catalog/catalogue (not consistent with other catalogs/catalogues).
- Each model and type in the catalog/catalogue is represented by an alpha label.
- Serial Number** - Applies to Engine or Frame serial numbers depending on the section. The serial numbers of a unit (frame, engine, carburetor) should be checked prior to ordering parts for the unit. In cases where a part has been modified, the beginning and/or ending serial number of the unit bearing the modification is listed in the "SERIAL NUMBER" column. Modification parts can be controlled by three types of numbers as described below.
Engine serial number - Engine group parts (Block numbers beginning with "E").
Carburetor identification number - Carburetor component parts.
Frame serial number - Frame group parts (Block numbers beginning with "F").
 Note 1 - A modification that does not follow the pattern above will be clarified by a comment located below the part description.
 A serial number chart and a guide to serial number locations are provided in the front portion of the catalog/catalogue.
 Note 2 - Although most models will be identified by Engine and Frame serial numbers, some models may be identified by one serial number only - either Engine serial number or Frame serial number.
- Type*** - Model Type is defined in the serial number chart.
- ORG*** - Manufacturing country of origin of the unit.
- QTY** - Quantity required for the specified Block/Section.
 A. "AR" in place of the quantity indicates AS REQUIRED.
 B. "()" Parentheses in the quantity indicate "optional".
- Part Number** - Part number corresponds to the reference number and application. Several part numbers may be listed under one (1) reference number.
 Note: For U.S. only - For your convenience the current supersede chain, as of print date, has been listed. Supersede chains are subject to change without notice.
- H/C** - The Honda Code and Part Number share a 1 to 1 relationship (U.S.A. only).
- The Block Number identifies the catalog/catalogue section.

CONSTRUCTION OF PART NUMBERS

All parts are classified into two groups, "GENERAL PARTS" and "STANDARD PARTS". All parts are numbered according to the system described below:

General Parts

Example: Driver Seat Assembly Part No. 77400-634-671ZA
 Function No. 77
 Component No. 400
 Model Code No. -634-
 Modification Process Design 671
 Color/colour Indicator** ZA

Standard Parts

Example: 8 x 18 Hex. bolt Part No. 92000-08018-0A
 Function No. 92000
 Dimensions -08018-
 ISO Standard Designation 0
 Chemical Surface Treatment A

**The color/colour indicator at the end of a part number signifies a color/colour. These color/colour indicators such as ZA, ZB, ZC . . . , except ZZ, do not identify the actual color/colour. Actual colors/colours are identified by a code that appears between asterisks in the part description.

Additional Information - The section index located at the bottom of each microfiche grid lists section titles. The Engine and Frame sections have separate section indexes.

Some Block Titles are numbered, such as Air Cleaner (1), Air Cleaner (3), Muffler (2) or Muffler (4), etc. These may skip numbers when some blocks apply in other volumes of the same model(s).

*When columns become full, additional data is displayed on a second line.

This page intentionally left blank.
